Differentiation of elementary functions of a real argument research

Grigory Grigorievich

December 2022

1 Введение

Сегодня мы обратим внимание на дифференцирование следующего представителя класса элементарных функций действительного аргумента:

$$f(x) = x^x$$

2 Упрощение функции

по методу Султанова,

$$f(x) = x^x$$

итак,

$$f(x) = x^x$$

3 Поиск производной

${f 3.1}$ давайте найдем f'(x)

заметим, что

$$f'(x) = (x^x) \cdot ((1.000000 \cdot \ln x) + x \cdot \frac{1.000000}{x})$$
$$= (x^x) \cdot ((\ln x) + x \cdot \frac{1.000000}{x})$$

итак,

$$f'(x) = (x^x) \cdot ((\ln x) + x \cdot \frac{1.000000}{x})$$

4 Разложение в ряд тейлора

давайте найдем разложение в ряд тейлора функции f(x) в точке 1.000000 до $o((x-1.000000)^8)$

4.1 давайте найдем f(1.000000)

легко видеть, что

$$f(1.000000) = 1.000000^{1.000000}$$
$$= 1.000000$$

итак,

$$f(1.000000) = 1.000000$$

4.2 давайте найдем f'(1.000000)

очевидно, что

$$f'(1.000000) = (1.000000^{1.000000}) \cdot ((\ln 1.000000) + 1.000000) \cdot \frac{1.000000}{1.000000})$$
$$= 1.000000$$

итак,

$$f'(1.000000) = 1.000000$$

4.3 давайте найдем $f^{(2)}(1.000000)$

доказательство следующего утверждения остается в качестве упражнения читателю:

$$f^{(2)}(1.000000) = (\alpha_0 \cdot ((\ln 1.000000) + 1.000000 \cdot \frac{1.000000}{1.000000})) + (1.000000^{1.000000}) \cdot ((\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}))$$
 где $\alpha_0 = (1.000000^{1.0000000}) \cdot ((\ln 1.000000) + 1.0000000 \cdot \frac{1.0000000}{1.0000000})$

$$= 1.000000 + 1.000000$$
$$= 2.000000$$

итак,

$$f^{(2)}(1.000000) = 2.000000$$

4.4 давайте найдем $f^{(3)}(1.000000)$

заметим, что

$$f^{(3)}(1.000000) = \gamma_0 + (\delta_0) + (1.000000^{1.000000}) \cdot \left(\left(\frac{-1.000000}{1.000000} \right) + \left(\frac{-1.0000000}{1.000000} \right) + \left(\frac{-1.000000}{1.000000} \right)$$

$$= 1.000000 + 1.000000 + 1.000000 + 1.000000 + -1.000000$$
$$= 3.000000$$

итак,

$$f^{(3)}(1.000000) = 3.000000$$

4.5 давайте найдем $f^{(4)}(1.000000)$

легко видеть, что

$$\mu_0 = (\lambda_0) - 0.000000 - -1.000000 \cdot (1.000000 + 1.000000) \cdot ((1.000000 + 1.000000 \cdot 1.000000) \cdot (1.000000 \cdot 1.000000) \cdot (1.000000 \cdot 1.000000))$$

= 8.000000

итак,

$$f^{(4)}(1.000000) = 8.000000$$

4.6 давайте найдем $f^{(5)}(1.000000)$

заметим, что

$$\begin{split} f^{(5)}(1.000000) &= \tau_0 + \upsilon_0 + \phi_0 + (\chi_0) + (1.000000^{1.000000}) \cdot ((\psi_0) + (\psi_0) + (\psi_0) + (\psi_0) + (\psi_0) + 1.000000 \cdot \frac{(\gamma_1)}{1.000000}) \\ &= \rho_0 = (1.000000^{1.000000}) \cdot ((\ln 1.000000) + 1.000000) \cdot \frac{1.000000}{1.000000}) \\ &= (\alpha_0 \cdot ((\ln 1.000000) + 1.000000) \cdot \frac{1.000000}{1.000000}) + (1.000000^{1.000000}) \cdot \frac{(1.000000)}{1.000000}) + \frac{1.000000}{1.000000}) \\ &= \rho_0 = (\beta_0 \cdot ((\ln 1.000000) + 1.000000) \cdot \frac{1.000000}{1.000000}) + \frac{1.000000}{1.000000}) \\ &= \rho_0 = (\beta_0 \cdot ((\ln 1.000000) + 1.000000) \cdot \frac{1.000000}{1.000000}) + \frac{1.000000}{1.000000}) \\ &= \rho_0 = (\beta_0 \cdot ((\ln 1.000000) + (\ln 1.000000) \cdot \frac{1.000000}{1.000000}) + \frac{1.000000}{1.000000}) \\ &= \rho_0 + (\delta_0) + (1.000000^{1.000000}) \cdot (((\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) + \frac{1.000000}{1.000000}) \\ &= \rho_0 + (\delta_0) + (1.000000^{1.000000}) \cdot (((\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000})) + \frac{1.000000}{1.000000}) \\ &= \rho_0 + (\delta_0) + (\frac{1.000000}{1.000000}) \cdot ((\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) \\ &= \rho_0 + ((\frac{1.000000}{1.000000}) + (\frac{1.000000}{1.000000}) + (\frac{1.0000000}{1.000000}) + (\frac{1.0000000000}{1.0000000}) + (\frac{1.000000000000000}{1.0000000}) + (\frac{1.00000$$

= 10.000000

итак,

$$f^{(5)}(1.000000) = 10.000000$$

4.7 давайте найдем $f^{(6)}(1.000000)$

заметим, что

$$f^{(6)}(1.000000) = \rho_1 + \sigma_1 + \tau_1 + \upsilon_1 + (\phi_1) + (1.000000^{1.000000}) \cdot \left(\left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right) + \left(\frac{(\gamma_1) - \mu_0 \cdot ((\varepsilon_1) + \varepsilon_1)}{\zeta_1 \cdot \zeta_1}\right)$$

```
где \alpha_0 = (1.000000^{1.000000}) \cdot ((\ln 1.000000) + 1.000000 \cdot \frac{1.000000}{1.000000})
